Project Construction and Management

How do you control your works to ensure on time completion.

Any service is dependent on planning, the client must allow sufficient time for us to produce any required drawings. Therefore we would consult with all relevant parties to produce a program of works.

How do you resource manufacture of your works

We do not manufacture.

How do you resource on site installation of your works.

Planning and consultation with all parties to produce a program of works. Allocate sufficient manpower to meet any agreed time scale. Attend co-ordination meetings to ensure we are achieving the defined targets.

Please indicate the typical management structure normally employed.

Small projects are controlled from the nearest depot, on larger projects We would set up a site establishment and the management would be site based.

Quality Management.

We are not yet BS EN ISO 9001 registered, we do however operate our own system, whereby regular inspections and checks are carried out from the initial set-up to final dismantle.

Health and safety.

Please state the nature of the work services you provide with reference to the high/low risk work types you can undertake.

We provide a contract scaffolding service with a number of hazards that fall into various risk categories. We control these by undertaking risk assessments and drawing up a safe system of work, which is documented in our method statements

Do you have a company health and safety policy?

Yes, copy enclosed.

Please identify who is responsible for health and safety.

Mr P Wetten Managing Director.

Do you employ a health and safety advisor?

Yes

Do you carry out design work?

Small works are designed in house; approved designers carry out all larger design work externally.

Please attach your latest company accident statistics.

Copy enclosed.

Have you been prosecuted by the H.S.E or issued with any improvement or Prohibition notices.

See attached accident statistics

Please provide details of training.

Training comprises of initial induction training which is further enhanced with toolbox talks. Periodic training is also provided via the Construction Industry Training Board, "in house" Packages & also through Farrington & Associates, Safety & Training Consultants

Insurance and securities.

Please attach copies of your employers and public liability insurance.

Copies enclosed. We do not carry any professional indemnity, as all design work is carried out externally.

Do you have a parent company that is able to offer a guarantee of Performance?

No

Are you able to offer a performance bond provided by a financial house?

Subject to each individual contract.

Other information

SAY Scaffolding Ltd takes great pride in the fact that we have always achieved or exceeded our client's expectations in terms of programme, safety and value for money. We have for a number of years specialised in large construction projects all over the UK
